

File Handling

Assignment

- 1. Task:** Create a new text file and write a few lines of text into it.
- 2. Task:** Open and read the contents of the file you just created.
- 3. Task:** Add additional text to the existing file without deleting the current content.
- 4. Task:** Read and print each line from the file one by one.
- 5. Task:** Write the contents of a list to a file, with each item on a new line.
- 6. Task:** Read the file content into a list, where each line is an element of the list.
- 7. Task:** Count the total number of words in the file.
- 8. Task:** Copy the contents of one file to another file.
- 9. Task:** Check if a file exists before attempting to read it.
- 10. Task:** Delete a file using Python.
